## SUMMARY

Junior Software Quality Assurance (Manual) with hands-on experience in manual testing, test execution, regression testing, test case review, and User Acceptance Testing (UAT) on web-based applications within the banking industry. Background in Front-End Development provides strong understanding of application behavior, UI validation, and defect identification to support reliable and high-quality software delivery. Currently developing foundational knowledge in test automation and API testing (basic)

---

## EXPERIENCE

### Front-End Developer

CIMB Niaga

September 2024 – September 2025, Tangerang Selatan

- Assigned as a Front-End Developer in the Digital Workplace DevOps Team, contributing to ARJUNA, an all-in-one HR platform used across CIMB Niaga.
- Built and maintained responsive, accessible interfaces using React.js, TypeScript, and Tailwind CSS, ensuring seamless cross-device performance.
- Implemented features such as performance check-ins, Learning on the Go+, employee benefits, and claims processing into a centralized system.
- Integrated secure APIs and real-time data handling with React Query, ensuring data consistency across user sessions.

### Technology Graduates Program (MT)

CIMB Niaga

September 2023 – September 2024, Tangerang Selatan

- **Phase 1 (Intensive Training):** Completed intensive training in banking technology, digital product strategy, industry landscape, and professional development, with exposure to enterprise systems and regulated environments.
- **Phase 2 (IT Division Rotation):** Rotated across six IT divisions (development, infrastructure, QA/testing, cybersecurity, data, and project management) to understand end-to-end software delivery and quality processes.
- **Phase 3 (OJT – QA & Development):** On-the-Job Training (OJT) within the IT team, rotating through Quality Assurance and Front-End Development roles, primarily involved in basic manual testing, including test execution based on existing test cases, functional testing on web applications, defect reporting and re-testing after fixes, and supporting UAT and release preparation under team supervisions.
- Assisted in basic test documentation and test result reporting to support QA activities during feature validation and UAT phases.

### UI/UX Designer Intern – Citiasia Inc.

Citiasia Inc.

August 2021 – February 2022, Jakarta

- Designed digital marketplace apps and online survey platforms with a focus on usability.
- Created wireframes, interactive prototypes, and high-fidelity mockups using Figma and Adobe XD.
- Collaborated closely with developers and system analysts to maintain consistency between design and implementation.

### UI/UX Designer & Front-End Intern

PT. Mayaksa Mugi Mulia

February 2021 – April 2021, Jakarta

- Conducted user research and designed the UX/UI for the Botanical Garden website.
- Developed a design system and ensured visual consistency.
- Collaborated with developers and participated in front-end design implementation.
- Conducted usability testing with real users.

---

## PROJECT

### ARJUNA

CIMB Niaga • [arjuna.cimbniaga.co.id/](https://arjuna.cimbniaga.co.id/) • February 2024 – September 2025

- Contributed to the development and maintenance of ARJUNA, CIMB Niaga's all-in-one HR platform used by 10,000+ internal employees across Indonesia.
- February – July 2024 (OJT Phase): Assigned to a small project team of three, responsible for delivering new features with limited supervision. Contributed to front-end implementation while also supporting manual functional testing, basic regression testing, defect reporting, and User Acceptance Testing (UAT) to ensure feature readiness before release. Assisted in preparing basic test evidence and validation notes during UAT and release readiness activities.
- August 2024 – September 2025: Focused primarily on Front-End Development, supporting feature enhancement, bug fixing, and collaboration with QA teams during testing and release cycles.

### Survey Asia Website

Citiasia Inc. • [surveyasia.id/](https://surveyasia.id/) • August 2021 – February 2022

- Collaborated with developers and system analysts to redesign the Survey Asia website for better usability and visual consistency.
- Conducted user research through interviews and surveys to identify pain points and user needs.

- Created wireframes, high-fidelity mockups, and responsive design layouts using Figma.
- Developed a modular design system to ensure scalability and consistency across different pages.
- Delivered all design assets and documentation to developers, ensuring pixel-perfect implementation.
- Resulted in a 40% increase in user engagement and improved accessibility based on post-launch analytics.

---

## EDUCATION

### Bachelor's Degree in Informatics Engineering

Universitas Budi Luhur · Jakarta, Indonesia · 2023 · 3.38

---

## CERTIFICATIONS

### Front End React Night Bootcamp | Hactiv8 | 2024

---

## COURSEWORK

### The Complete 2026 Software Testing Bootcamp

Udemy · 2026

- Manual software testing, test case and test scenario creation, functional testing, regression testing, black-box testing (equivalence partitioning, boundary value analysis), Agile & Scrum testing, Jira and Zephyr Scale, basic API testing with Postman, mobile testing fundamentals
- Applied manual QA testing skills by creating and executing test cases and test scenarios, performing functional and regression testing, and identifying application defects based on requirements. Worked within Agile testing flows, managed test cases using Jira and Zephyr Scale, conducted basic API testing with Postman, and validated application behavior during UAT and mobile testing scenarios.

### Software Quality Assurance

MySkill · 2025 · Fundamental dari QA, Teknik software testing, QA Automation, API Automation, Web Automation dan Mobile Automation

- Applied QA fundamentals through hands-on practice by creating test cases, executing functional and regression testing, identifying and documenting bugs, and performing UAT scenarios. Practiced basic automation and API testing concepts to understand scalable quality assurance processes.

---

## SKILLS

**Software Quality Assurance** : Manual Testing, Test Case & Test Scenario Design, Functional Testing, Regression Testing, User Acceptance Testing (UAT), Bug Reporting & Tracking, Test Documentation, Basic Database Validation, API Testing (Postman).

**Tools & Technical (Basic / Learning)** : Cypress, Katalon.

**Supporting Knowledge** : HTML, CSS, JavaScript, React, Java, Wireframing & Prototyping (Figma)

**Methodologies** : Agile & Scrum.
